## HSC resources

Clarence Regional Library provides a range of resources to assist students with their HSC studies. As part of the library's [HSC Collection](#) students can access various Excel guides and study notes.

If you are unable to find information, submit your question using our online [Request for Information](#). Our Information Services staff can assist you in your research.

## eResources

Clarence Regional Library subscribes to a range of [eResources](#) which you can access at the library and from home. All you need is your Library barcode (from your library card) and a PIN (see library staff to arrange for a PIN/password to be added to your card if you don't already have one).

These online resources can provide full text material covering virtually every subject area from journals, newspapers, newswires and reference books.

- [Australia/New Zealand Points of View Reference Center](#) is a database designed to provide students with a series of essays that present multiple sides of a current issue. The database contains 100 topics, each with an overview (objective background/description), point (argument) and counterpoint (opposing argument).

- Topics covered include: abortion, climate change, cloning, freedom of speech, gay marriage, globalisation, green consumerism, nuclear energy, population growth, renewable energy, stem cell research, and worldwide oil supplies.
- The State Library of NSW [Readers Card](#) enables you access to their range of [Databases from Home](#). Follow the prompts, get your card, and get online.

## HSC Study Lab

To assist HSC science students, the library now subscribes to the HSC Study Lab. This is an online study companion and revision tool for students in years 11 and 12. The courses cover all syllabus dot points and is available online 24/7.
