SCANNING MICROFORM WITH SCANPRO

By IANZ.com.au

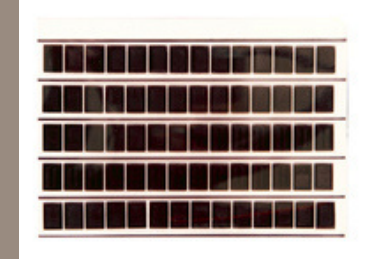

SEVEN WEST MEDIA

IANZ

- IANZ was formed in 2020 when it was appointed the Sales and Servicing Licencee for Scanpro in Australia & NZ
- Since that time we have expanded with 2 branches, one in Beechworth Victoria and a Digitisation Centre in Melbourne
- IANZ is also a Digitisation Bureau Scanning Documents, Microfilm, Books and Maps to name a few.
- We have over 100 technicians Australia & NZ wide offering Scanpro Servicing in all areas of both Countries.
- Clients that have acquired Scanpro Microfilm equipment in the last year with all types of Microform.

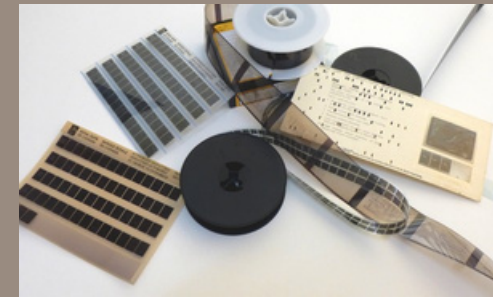

MICROFORM MARKET IN AUSTRALIA

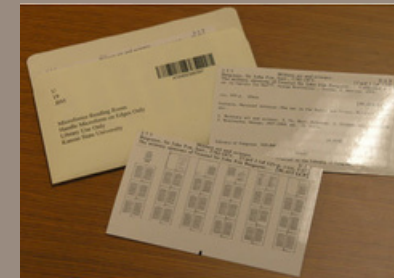

- It is estimated that there are millions of individual pieces of Microform in Australia
- Estimated that only 30-40% has been converted to digital format.
- Collections are held by all types of organisations including Government, Corporate and not for Profit.

Types of Microform

- Microfiche
- Microfilm
- ComFiche
- 3M Cartridge Film
- Aperture Cards
- Micro-opaque
- Jacket Fiche
- Duplex Film
- Positive Film
- Micro Cards

- Mostly made of cellulose nitrate, cellulose acetate or polyester base.
- Major increase in Microfilm Writing equipment throughout the world.

COMMON WAYS FOR ORGANISATIONS TO USE MICROFORM

- Research for both internal and external patrons
- Capture purposes for local History & Archive organisations
- Technical Data access
- Reproduction purposes

Commonly, Microform Scanners/readers are used. With the increases in Technology, more and more functionality of these machines is being produced.
